BIOGRAPHY

I'm an Informatics graduate with a passion for web development and modern technologies. During my third year of university, I joined Factory Worldwide as a Software Developer 1, where I spent 11 months sharpening my skills in a professional development environment. Since then, I've continued growing through hands-on projects and coursework in frameworks such as Angular, Flask, and React. I have experience across a variety of programming languages and tools and take a particular interest in the intersection of web engineering, Data Science, and AI. I'm hardworking, positive, and purpose-driven — always focused on delivering high-quality results on time.

EDUCATION

Bachelor of Science in Mathematics and Informatics

University of Singidunum, Belgrade, Serbia

1/10/2018 - 25/03/2024
